

MINI SYSTEM

Product Description

The MINI trench drain line is a simple modular system for uncomplicated D.I.Y. installation. These 4" wide flat trench drains are available in 39.37" (1 meter) and 19.69" (0.5 meters) long and they are easily joined together by connecting male and female profiles. Each channel section has a precast vertical outlet for 4" pipes. Available with galvanized steel slot ADA and galvanized steel mesh grates that provide a neat transition from the trench drain to the adjoining road surface.

Apart from use in private and leisure areas, the MINI trench drain is also suitable for sports fields, pedestrian areas, courtyards and car parks. The grates are held firmly in the channels, avoiding jamming between the adjoining surfaces. The use of natural building materials guarantees environmental friendliness.

- Practical system for easy D.I.Y. installation
- Precast vertical outlet to connect 4" pipes in each section
- Edge rail incorporated in the grate
- Male and female channel profiles for easy fitting

Areas of Application

- Sports Fields
- Shopping Malls
- Pedestrian Areas
- Domestic Driveways
