

Raven HDPE Products

Quality – Service – Commitment – Delivered.

OIL WATER SEPARATOR SPECIFICATIONS

Sigma-Raven Oil Water Separator are design specific and meet or exceed today's strict discharge limits. Our performance proven separators are made from the highest quality "High Density Polyethylene" recycled resin to ensure structural integrity.

Manufacture Process: Sigma-Raven Oil Water Separators are manufactured by rotational molded process.

Material: Shall be manufactured from recycled Polyethylene Resin

Color: Black.

Impact: First unit from each run shall be impact tested with ball peen hammer

Ease of Installation:

- Mounting flange is an integral part of the separator
- Incorporates a Neoprene elastomeric seal
- Installs with anchor bolts to the wall of the manhole
- Cannot be dislodged by vacuum hose, reverse flushing or storm water flow

Features / Benefits:

- Cost Effective
- Light weight
- Can be installed by one person
- Easily accommodates outlet pipe that is not aligned at 90 degree to the manhole wall.
- One size separator fits every type of pipe; varying inside diameters is not a problem.
