

# HYDROline PRO Overview

## Product Description

The innovative monolithic Aluminum design was developed for areas with necessity for function and aesthetics. Given the light weight of Aluminum, channels come standard in 9.84 LF (26 lbs) and 3.28 LF (9 lbs) lengths for a fast low cost installation. The single piece design is rattle-free and provides easy access for maintenance given there is no grate to remove. HYDROline PRO is available in a 5" nominal width channel and comes standard in jet black, alternate colors are available on request.

## Project Applications

- Parking Garages
- Building Facades
- Balconies
- Rooftops
- Automobile Service Centers
- Fire Stations

## Aluminum Advantages

NON-COMBUSTIBLE

Melting Point Of  
1000°F
