

HYDROline

HYDROline

HYDROline is a flat drainage channel made on one ductile iron piece. Very easy to install as it sits directly on top of the concrete.

Application areas:

- Indoor and outdoor areas
- Indoor car parks, underground garages, parking decks, terraces, industrial plants etc.
- Pedestrian areas
- Areas with low rainfall

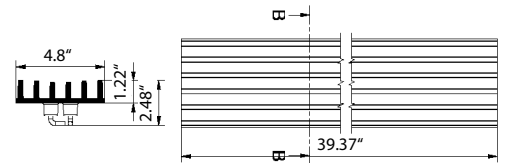

Properties:

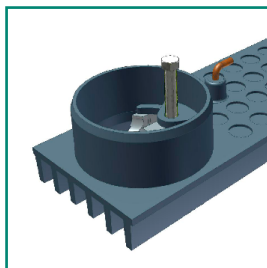

- Low concrete bed
- Ease of installation
- Extremely resistant
- Easy cleaning
- One piece = rattle free
- Fixes to the concrete bed thanks to built in anchors underneath

Description / sizes:

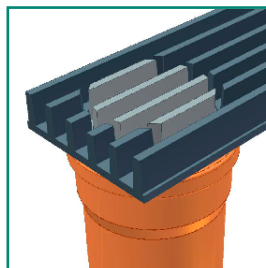

- Standard part approx. 4.72"(120mm) x 39.37"(1000mm)
- Part with outlet approx. 4.72"(120mm) x 39.37"(1000mm)
- Height without anchors approx. 1.18" (30mm)
- Load Class F 900kN (202,320 lbs)
- Ductile Iron

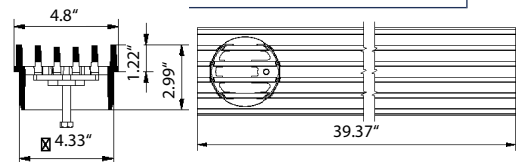

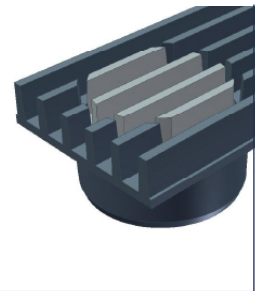

Part. No. CHG68000-000 26.45 lbs

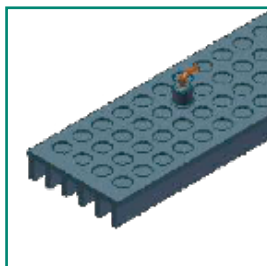

Security of grate due to bar = protection against anti-theft and vandalism

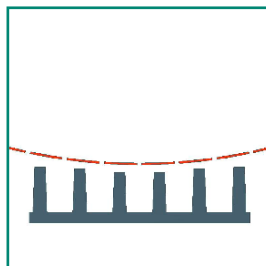

Channel with vertical outlet for 4" pipe

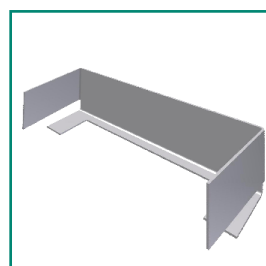

Part. No. CHG68000-018 26.45 lbs

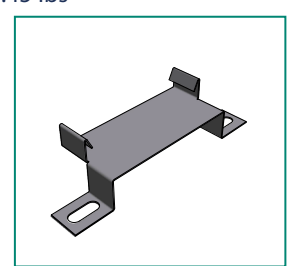

Anchors underneath help secure the channel to the concrete

Concave shape prevents overflow

End wall piece available Part No. CHG68001-700

Installation Support Part No. CHG68001-701
