

DMplug

PRODUCT SPECIFICATIONS

The DMplug is a patented, inexpensive, non-pressure alternative; keeping debris and sediment from entering pipe and fittings. The tapered body allows for use in a variety of inside diameters without the expense of purchasing multiple plugs. The taper keeps it tight and in place. The DMplug will not absorb sediment or water, keeping the plug lightweight and ready for use time after time. Its use is not limited to pipe, but can be used in fittings or any round application.

How the DMplug Benefits the Waterworks Contractor

- Quick and easy, no pumps or tools needed
- Inexpensive, one size plug does the work of many
- Efficient, the same plug can be used in bell or spigot ends of most pipe and fittings
- A single plug will fit a variety of inside diameters
- Wide range of sizes with overlapping plug OD ensures that a DMplug will fit
- Made of lightweight, durable, non-absorbent closed cell material
- Plugs can be ordered to a specific size for a custom fit

The DMplug fits in the Bell and/or Spigot end of PSM, IPS, C900, Ductile Iron, and any other pipe and fittings used in the waterworks industry.

Product Number	DMplug Size	DMplug Range
DM-4	4"	3.75" - 6.0"
DM-6	6"	5.0" - 7.75"
DM-8	8"	7.0" - 9.75"
DM-10	10"	9.0" - 11.75"
DM-12	12"	10.75" - 13.75"
DM-14/15	14"/15"	12.75" - 15.75"
DM-16	16"	14.75" - 17.75"
DM-18	18"	16.5" - 19.75"
DM-20/21	20"/21"	18.5" - 22.75"
DM-24	24"	22.0" - 16.5"

Custom cut, tapered plugs are available for customer's specific need and sizing up to 48" OD.

***Dual wall and other exterior ribbed pipe will require a separate plug for bell and spigot.**
