SPECIFICATIONS FOR RMB118-L BUBBLE LID

Manufacture Process:

RMB118-L: SIGMA's 11" x 18" Roto Molded lid is manufactured using HDPE resin in a steel mold resulting in a hollow "bubble" like construction with a textured non-slip surface.

The lid will fit on a respective meter box satisfactorily and is interchangeable with most heavy wall meter boxes.

Testing:

Test protocol shall follow the process outlined in ANSI SCTE 77. The lid is not tier rated but has a crush strength of over 4000 lbs.
