WATERWORKS UNDERGROUND ENCLOSURES

SIGMA offers an extensive line of Thermo Plastic Water Meter Boxes, Pits, Extensions, and Lids made of High-Density Polyethylene. The box and lid have excellent strength to weight ratio. The lid is light weight, durable, closed cell (frost protection) and radio waves from the water meter easily pass through the Polyethylene. Our boxes and lids are round, rectangular or oval in any size or configuration. They can be designed and manufactured to meet your specifications.

Features & Benefits

- All polymer design with laminated walls to provide greater side load-bearing capacity.
- Anti-settling flange around the base.
- Available with a bright white interior.
- Multiple color choices: including black, gray, purple, tan, green, and blue.
- Available as 3rd party certified for 20,000 lb. vertical load with no permanent deformation (H20).
- Large inside working area.
- Rectangular boxes available in stackable and non-stackable.
- Customizable mouseholes.
